LOLA

DESIGN BY ALISTAIR TAIT & STEPHEN BAKER - 2025

Lola is the result of a collaboration between Melbourne-based artist Stephen Baker and furniture manufacturer Alta Interiors. Blending artistry with functionality, Lola features clean, intentional lines that exude elegance and purpose. Its durable construction makes it equally at home in both indoor and outdoor spaces, whether by the pool, in a sunroom, or as part of a thoughtfully curated interior. Designed to be both admired and used, Lola invites interaction and appreciation.

Built for year-round enjoyment, Lola features a UV powder-coated aluminum frame that ensures durability while remaining lightweight. The removable reticulated foam cushion dries quickly and is upholstered in 100% solution-dyed fabric, making it ideal for high-UV climates.

MATERIALS

- Aluminium Frame
- Reticulated Foam
- Fabric
